Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it.
Through this work we have come to value:

Individuals and interactions over processes and tools
Working software over comprehensive documentation
Customer collaboration over contract negotiation
Responding to change over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

SCRUM FRAMEWORK

TDD

ALL CODE IS GUILTY
UNTIL PROVEN INNOCENT

SCRUM

So, what is Scrum?

Scrum is an **agile** process that allows us to focus on delivering the **highest business value** in **the shortest time**

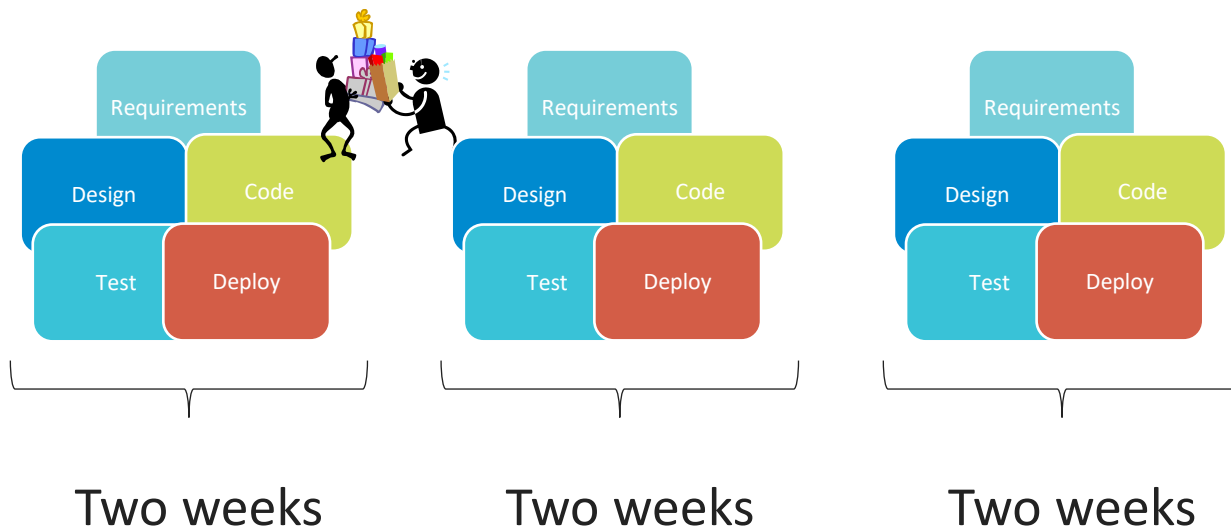

The **business sets the priorities**. Teams **self-organize** to determine the best way to deliver the highest priority features

Every week to a month anyone can see **real working software** and decide to release it as is or continue to enhance it

Scrum Sprints

Sprints

- Scrum development makes progress in a series of iterations (called “sprints”).
- Constant duration, 1–4 weeks.
- Product is designed, coded, tested and documented during the sprint.
- No changes during sprint!

Sprint Planning

What level of accuracy do we need?

Scope

How many backlog items (stories) can we do during the sprint?

Resources

Fixed (team)

Time

Fixed (Sprint length)

PO adds more work

- Better to **lock** the Sprint scope for new stories!
- Create new stories for new sprint if a lot of details were discovered.
- Change priorities only if team is comfortable.

Scrum is not a mini-waterfall

Scrum

Not like this....

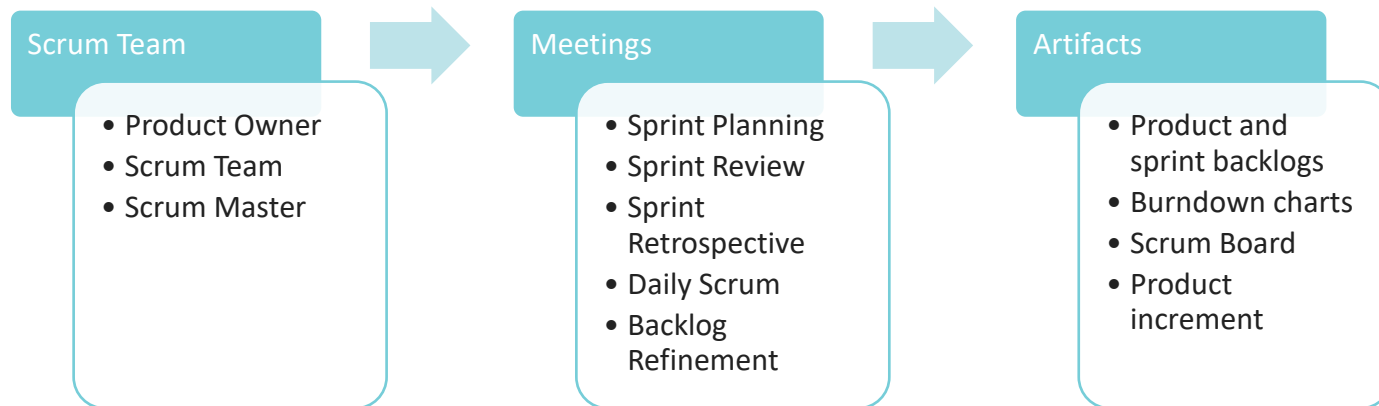

Like this!

SCRUM FRAMEWORK

Scrum Framework

SCRUM ROLES

Product Owner

- Responsible for the profitability of the product (ROI)
- Defines the features of the product
- Decides on release date and content
- Prioritizes features according to market value
- Has the vision of the product
- Accepts or rejects work results

Development Team

- Cross-functional self-organizing group of 5-9 people
- Attempts to build a “potentially shippable increment” each Sprint
- Members should be full-time (may be exceptions, e.g., DBA)
- Ideally, no titles but rarely a possibility
- Membership should change only between sprints

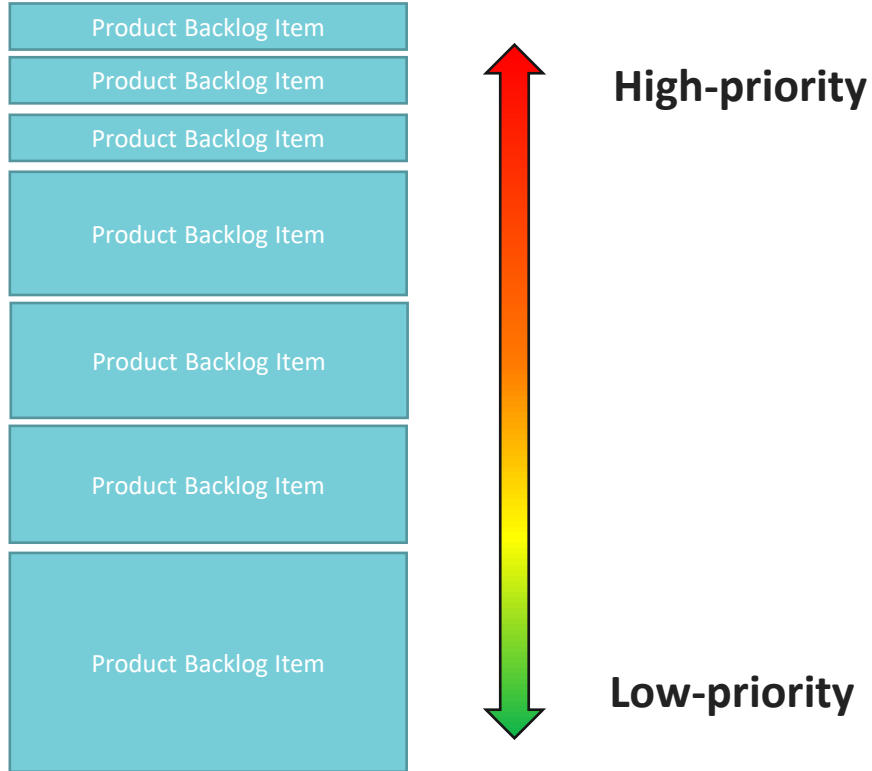

Scrum Master

- Responsible for enacting Scrum values and practices
- Removes impediments
- Ensures that the team is fully functional and productive
- Enables close cooperation across all roles and functions
- Not manager, but shields the team from external interferences

Helicopter View for Scrum

SCRUM FRAMEWORK

- 1. Build your own “Helicopter View for Scrum ”. Send it as a PDF to **mariia_fedorova@epam.com** with topic **[FE UA][Summer2021] Your Name**.
- 2. Go to <https://ideaboardz.com/for/Questions%2014%2F06/3937649> and add there your questions about Scrum, SDLC, etc. Vote for questions you like.
- 3 Go to <https://trello.com/invite/b/HSitO9K9/cc59fc6994d55a5d7947e7825bda3763/agile-fun> and add funny pictures and jokes about SDLC, Agile, Scrum there. Try to understand why they are so fun.
- 4. Add your feedback via <https://ideaboardz.com/for/Feedback%202021-06-14/3937652>

TIME FOR DISCUSSION

THANK YOU!
